

Vinnakota Phani Kumar

phanivinnakota122@gmail.com | GitHub | LinkedIn

Professional Summary

Technical Engineer specializing in building scalable, high-performance systems by combining robust backend architectures with modern web technologies. Passionate about creating seamless digital experiences with strong engineering fundamentals.

Technical Skills

Core Stack: Linux, JavaScript, Go, Python, MySQL, MongoDB

Architectural Patterns: Microservices, 3-Tier Architecture, Real-time Systems

System Operations: Infrastructure as Code, Containerization, CI/CD Pipelines, Security

Projects

EduConnect

GitHub Repository

- Built a full-stack educational platform connecting parents, mentors, and teachers with role-based dashboards.
- Implemented real-time analytics, attendance tracking, and performance monitoring.
- Used React, Node.js, MongoDB, JWT authentication, and bcrypt for security.

SkillTern

GitHub Repository

- Developed a rule-based internship matching platform connecting students and companies.
- Designed backend using Node.js and Express with MongoDB.
- Implemented secure authentication using JWT and bcrypt.

ToDo App

GitHub Repository

- Built a full-stack productivity application using Flutter and Node.js.
- Integrated Firebase Authentication and MongoDB Atlas for secure data handling.
- Focused on responsive UI and real-time data synchronization.

Certifications

- Python Essentials 1 – Cisco (2025)
- Python Essentials 2 – Cisco (2025)
- Linux Administration – Red Hat (2026)
- JavaScript Certification – Udemy (2026)
- Ethical Hacking Weaponization – Udemy (2025)
- GUI Development Using Python – Udemy (2025)

Education

Bachelor of Technology (B.Tech)

Prasad V Potluri Siddhartha Institute of Technology
